Skills

- Html | CSS | JavaScript | Tailwind | Bootstrap | React | Redux | Next | Typescript | MongoDB | Prisma | Sass | Git | GitHub | Restful APIs
- Communication | Problem Solving | Teamwork | Creativity | Clean code

Projects

Taskify – Manage your projects   **taskify-nouman.com**

- Developed and designed a dynamic project management web application using React, styled-components, Framer-Motion, and React Router DOM, for efficient projects management.
- Implemented user authentication, and for database I am using Supabase.
- React Hook Form for form validations, React-Query for data fetching and caching, optimizing the application's performance.

Codepen – Compiler for (Html, CSS, js)   **codepen-clone.com**

- Designed user interface with a Tailwind CSS, Framer-motion, ensuring a visually appealing and responsive user experience.
- Implemented credentials, and Google and GitHub authentication systems for seamless user interactions.
- Utilized React.js (v18) with Redux for state management, incorporating form validation and efficient page loading states.
- Implemented React Router DOM and React Split Pane for smooth navigation and layout customization.
- Firebase for database management and authentication.

Airbnb-Clone (Fullstack)   **airbnb-clone.com**

- Developed a responsive Nextjs (v14) web application using Tailwind CSS, Prisma, MongoDB, next-auth, zustand, typescript, react-hook-form, and fetching data in server components directly from the database without using an API.
- Implemented advanced searching, allowing users to filter by category, date, location, number of guests, rooms, and bathrooms.
- Integrated credential authentication, Google authentication, and GitHub authentication using next-auth.
- Demonstrated proficiency in backend development by explaining the creation of POST and DELETE routes in route handlers.

Experience

Junior React Developer   **10/2023 - Present**

- Achieved a notable 25% reduction in system errors and a 30% improvement in application performance through the implementation of effective data fetching techniques and adept management of error and data states.
- Engaged in the design and implementation of a cloud computing-like system.
- Responsible for the creation and deployment of clusters etc. showcasing a strong grasp of cloud architecture.
- Played a key role in identifying and resolving challenges in the development and deployment processes.
- Collaborated with cross-functional teams, ensuring clear communication and alignment of development goals.

Front-end Developer   **09/2021 - 07/2023**

- Served as a freelancer on Fiverr, honing skills and actively contributed to various projects.
- Worked on various projects with and make the clients happy, showcasing a proactive and hands-on approach in JavaScript, React, Next and designing skills like Tailwind, bootstrap, Sass etc.

Education

Bachelor of Computer Science   **(University of Central Punjab)**   **10/2020 – 02/2024**

Enthusiastic Computer Science student pursuing a bachelor's degree. Focused on merging theoretical knowledge with practical skills.

Leadership Activities

- **Al-Khidmat Foundation:** Played a pivotal role in organizing and distributing essential food supplies to over 700 families in need.

Led a team of 15 individuals in successful fundraising events, demonstrating strong leadership and organizational skills.

Certifications

- Front-End Development Coursera: **Certificate link**
- HTML, CSS, and JavaScript for Web Developers: **Certificate Link**
- Foundations of User Experience (UX) Design: **Certificate Link**
